RISKS AND DISCLOSURES

Mutual fund investing involves risks and loss of principal is possible. Investing in foreign securities, especially in emerging and frontier markets, entails special risks, such as currency fluctuations and political uncertainties, which are described in more detail in the prospectus. Investing in small and micro cap funds will be more volatile and loss of principal could be greater than investing in large cap or more diversified funds. Being non-diversified, the Funds can invest a larger portion of their assets in the stocks of a limited number of companies than a diversified fund. Non-diversification increases the risk of loss to the Funds if the values of these securities decline.

The investment objective of the Global Select Fund, International Select Fund, and Emerging Markets Select Fund is long-term growth of capital.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. The MSCI Emerging Markets Index is a free float-adjusted market capitalization index designed to measure the equity market performance of emerging markets. The MSCI EAFE Index is an unmanaged index capturing large and mid-cap representation across developed markets around the world, excluding the US and Canada. The MSCI AC World Index (ACWI) is an unmanaged index capturing large and mid-cap representation across 23 developed markets and 23 emerging markets. You cannot invest directly in any index.

An investor should consider investment objectives, risks, charges, and expenses carefully before investing. To obtain a prospectus, containing this and other information, visit www.WasatchGlobal.com or call 800.551.1700. Please read it carefully before investing.
